

CONTROLS FIELD COMMISSIONING SERVICES

The next time you are involved in a project that is using Price products and controls, consider the need for the field commissioning service that we offer. This service adds value and gives you peace of mind; knowing that the commissioning is conducted prior to occupancy ensures that all Price devices and equipment are installed correctly. Arranging on-site commissioning from the start of the project can save the building owner time and money.

To have a job commissioned, contact the Controls Applications team to help with quoting and lead time: controls@priceindustries.com

COMMISSIONING SERVICES OFFERED

Rooftop Unit Controllers

- Ensure power to controller
- Verify wiring connectivity from rooftop unit to rooftop controller
 - Heating stage testing (test in both stand-alone and networked modes)
 - Cooling stage testing (test in both stand-alone and networked modes)
