

# STANDARD CEILING CONFIGURATIONS

Lay-in T-Bar ceiling systems come in many styles and configurations. Selecting the correct border style for a diffuser is essential to ensure performance of the diffuser is maintained and the desired appearance within the ceiling system is achieved. The information required to select the correct diffuser border style is, the ceiling tile type, ceiling system tee size, and module size. The table below provides some guidance to select diffuser border styles for the most common suspended ceiling configurations and diffusers.

		Tee and Tile	Diffuser Border Schematic	Typical Border Style
15/16" Flat Tee	Flat Tile			Type 31/3P - <b>SPD/SCD</b> Type 33/36/3P - <b>Modular</b> Type 3 - <b>Perf</b> Type EF - <b>CF</b> Type 14/15 - <b>SDS</b>
	Tegular/Beveled Tile			Type 15/15P - <b>SPD/SCD</b> Type 15 - <b>Perf</b> Type TG1516 - <b>CF</b> Type 20 - <b>SDS</b>
9/16" Bolt Slot Tee	Tegular/Beveled Tile			Type 17/17P - <b>SPD/SCD</b> Type 17/17P - <b>Modular</b> Type 17/17B - <b>Perf</b> Type TG916 - <b>CF</b> Type 17 - <b>SDS</b>
9/16" Flat Tee	Tegular/Beveled Tile			Type 17/17P - <b>SPD/SCD</b> Type 17/17P - <b>Modular</b> Type TG916 - <b>CF</b> Type 17 - <b>SDS</b>
9/16" Architectural Tee	Tegular/Beveled Tile			Type 17/17P - <b>SPD/SCD</b> Type 17/17P - <b>Modular</b> Type TG916 - <b>CF</b> Type 17 - <b>SDS</b>

\*Ceiling configurations and border styles should be confirmed prior to ordering

# STANDARD CEILING CONFIGURATIONS

## CORRECT SELECTION REQUIRES THE FOLLOWING DETAILS:

- + Ceiling grid tee width (9/16" or 15/16")
- + Ceiling tile edge detail (Tegular, Beveled, Flat, Concealed etc.)
- + Panel/module size (standard is usually 24"x24")
- + System color
